PACKAGE UNDERSINK SULLAGE SYSTEM

The **ALLIED PUMPS** Package Undersink Sullage System was developed to meet a continually growing need to handle sink and basin waste in circumstances where gravity discharge is not feasible.

Prime examples include tea preparation areas, wash areas, kitchenettes and basements. Units can be selected to handle up to 50˚C from dishwashers and glass washing machines.

Designed for quick and simple installations, the unit fits neatly into a single cupboard below a sink and runs with virtually no noise. All in-tank plumbing is included with inlet, outlet and vent connections. A high-level alarm float switch is fitted with an in-built buzzer to indicate blockage or failure.

KEY FEATURES

- Light weight
- 65 litre capacity
- Audible alarm
- Robust stainless steel pump
- Isolation and check valves
- Easy to install
- Lead/plug for standard power socket
- Removable lid

OPTIONS:

- Mains water isolation solenoid with interface to high level alarm.
