ALLIED PUMPS

Test Facilities to 700 L/sec

With in-house WA based facilities including; design selection, project management, drafting, stock holding, manufacture and in field service team, Allied Pumps has total control over production procedures ensuring quality standards and time frames are met.

Allied Pumps Canning Vale headquarters operates a high capacity, state-of-the-art Test Facility. The purpose built facility conducts comprehensive pump testing to ensure quality standards and pump performance requirements are met.

The Test Facility features the following:

- NATA calibrated instrumentation
- Flows up to 700L/sec
- Test up to 3 pumpsets simultaneously
- Capacity for large equipment such as containerised pumpsets
- AS2417 Compliant testing
- Client witness testing
- Ability to measure flow, suction and discharge pressures, pump speed, temperature, sound pressure level, vibration, current draw, kilowatts absorbed and much more.

The facility is operated in a ISO9001:2008 quality assured environment and testing is carried out by experienced and qualified technicians.
